

Medication Awareness

Date: Tuesday 4th June 2024

Time: 9:30 - 12:24

Venue: Edgar Wood Academy

Trainers: Robert Hallworth - Lead Pharmacist

Audience: All Secondary and Primary staff members

This course is ideal for:

- ⇒ *those who have a responsibility for the storing, administering or disposing of medication.*
- ⇒ *those who are just getting into this field or those who are requiring a refresher course.*

Working with & administering medication is a very important role and one which requires a thorough understanding of such issues as relevant legislation, safe administration procedures, possible side effects, the importance of effective record keeping and a range of other matters.

By the end of the course learners will understand:

- *Delegates obligations and that of their employer in regard to the documentation and the administration of medication.*
- *How medication should be stored.*
- *Knowledge of the common adverse reactions and side effects.*
- *Safe administration of medication.*
- *Controlled drugs.*
- *Oxygen administration*
- *Avoiding medicine errors.*
- *Disposal of medication.*
