

Outdoor Learning - Rocks & Local Geology

Thursday 6th June 2019

13:30 —15:30

Venue: Hollingworth

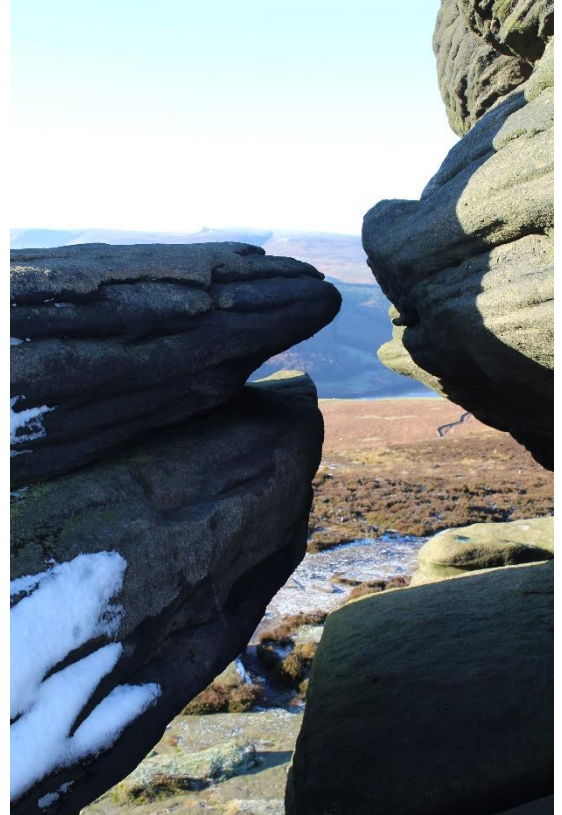

Lake Visitor Centre

Trainer: NatureEd CIC

Audience: All Staff

This session aims to provide teachers with the resources and knowledge to identify different types of rocks.

Focusing on the geology of the South Pennines, we will look at rock and fossil samples, learning about their formation and properties, and how they have shaped the local landscape.

Curriculum links:

Science (rocks, fossils, materials).

Geography (topographic features, fieldwork skills)
