Analyse your IDSR and school performance summary

Identifying your strengths and areas for improvement

Audience

Secondary and Sixth Form

School Impact

The course will enable you to have a secure understanding of the strengths and weaknesses in the school's historic data and likely inspection trails at your next Ofsted inspection. It will also enable you to inform your trust, school and departmental improvement plans and self-evaluation summaries.

- We will help you interpret and understand the data information in the new reports and shine a light on the areas to investigate that will inform your school improvement plans and evaluation summaries.
- You will be coached and supported by ECM advisers to write an inspection data summary for your school using ECM materials.
You will be provided with an ECM exemplar inspection data analysis summary to share 'What a good one looks like' and enable you to complete a high-quality document for your school or department.

By the end of the course you will:

- be familiar with the IDSR published in the Autumn term and update in the Spring;
- have a secure understanding of the data sources of the areas to investigate identified on the front page of your dashboard;
- have interpreted and analysed the data in the IDSR charts and tables to identify your school's strengths and weaknesses;
- have identified lines of enquiry to inform your school improvement strategies;
- have identified actions to address any weaknesses in the data;
- be able to link the inspection data summary report analysis to your school self-evaluation and school development plans and be able to demonstrate leadership capacity during an inspection through having a secure understanding of your school's data reports;
- complete a school performance summary for your school using the ECM materials.

What delegates have told us:

“As ever, we found the feedback incredibly useful and it it’s a real privilege to have access to your expertise. The support we have received from ECM has been key to the school’s rapid improvement and now ongoing successes.”

“It was enjoyable, well presented and there were lots of opportunities to share and gather ideas. Even better because the course leader knew what it was like for participants on the course. Great materials were provided for use back at school. Thank you for an enjoyable day.”
